

*HP Products invites you to attend our seminar on*

## **Public Health and Environmental Stewardship**

*Infectious Control and Awareness • Air Quality • Smarter Cleaning for Health*

October 6, 2009

**7:30AM to 8:30AM** REGISTRATION

**7:30AM to 9:00AM** BREAKFAST/TRADESHOW

**9:00AM to 10:00AM** STATE HEALTH COMMISSIONER

**Judith A. Monroe M.D.**

Dr. Monroe was appointed by Governor Mitch Daniels as the Indiana State Health Commissioner in March 2005. During which time she has served on the Institute of Medicine's Forum on Medical and Public Health Preparedness for Catastrophic Events and Committee on Preparedness for the Health Effects of Nuclear Attack. Throughout all the avenues of her career she has also initiated an annual statewide Public Health and Medicine Summit with a focus on preparedness training. This session will take a look at Indiana's preparation and preparedness with the involvement of H1N1, Swine Flu.

**10:00AM to 10:15AM** BREAK

**10:15AM to 11:00AM** MICROFIBER 101: THE TRUTH, THE MYTH, THE REALITY

**Mark Hoyle** *Global Market Product Manager*

The interest in microfiber cleaning solutions, over the past few years, has had a tremendous increase. More and more facilities are recognizing that a microfiber cleaning system can help reduce cross transmission of microorganisms and workman's compensation, while increasing productivity. In most cases, microfiber is the ideal cleaning method because of its inherent properties to efficiently and effectively clean. However, many managers having an interest in converting to a microfiber system, also have questions on the right use, training, and overall implementation. This session takes a deep dive into the technology of microfiber and unveils the new HYGEN Cleaning System.

**11:00AM to 11:10AM** BREAK

**11:15AM to 12:00PM** INFECTIOUS CONTROL & AWARENESS

**Scott Comptois** *JohnsonDiversey*

As the spread of disease becomes more prevalent, infectious control is a top concern and priority of our customers.

- *Understanding the risks of MRSA bacteria, Noro/Norwalk viruses and other disease-producing organisms*
- *Drawing comparisons between the effectiveness of our AHP-based cleaner disinfectant Oxivir Tb and conventional applications such as bleach*

**12:00PM to 2:00PM** LUNCH/TRADESHOW

\* twenty dollar fee for each individual attendee
