

1. Product Description:

The BRUTE® with venting channels is a new utility waste container from Rubbermaid Commercial Products that provides solutions to common user challenges. The built in vent channels greatly reduce the force required to lift full liners out of the container.

Patented liner cinch design provides quick and durable anchor points for can liners and eliminates time-consuming knot tying. A new lid is also available that eliminates water collection and provides a sturdy base for stacking multiple containers.

Fully round ProTouch™ handles and molded handles on the container's base allow users a more comfortable grip when lifting heavy loads or emptying.

The BRUTE® Waste Management System is composed of:

FG-2643-60 The BRUTE® Container

FG-2645-60 The BRUTE® Lid

2. Environment:

- Primary Application: Indoor with heavy Outdoor Exposure as well.
- Normal Operating Temp: 55° to 110°
- Storage Temp: 32° to 125°
- Transport Temp: 0° to 120°
- Usage: The BRUTE® is a utilitarian container and can be used in a variety of environments from Indoors to Outdoors. As a result, the container can be subjected to a range of temperatures and usages. Common usage is indoors, for the collection and transportation of waste.

3. Industry Standards:

- NSF

4. Manufacturing Process:

- Plastic: High pressure injection molding.
- Handles: High pressure injection molding.
- Logo Graphics: Hot Stamped

5. Materials:

- Primary Material: Polypropylene

6. Packaging:

This product will be shipped as follows:

- FG-2643-60 Four products per shipper corrugated carton
UPC Label on each shipper carton
- FG-2645-60 Four products per shipper corrugated carton
UPC Label on each shipper carton

7. Physical Characteristics

- Nominal height of container: 31.5"
- Nominal diameter of container: 24"
