

SRS: Your Complete Stain Removal System

Sunburst Chemicals Stain Removal System (SRS) was developed to assist laundry operations by keeping linens in circulation without damaging fabric, while maintaining a safe environment. This three-part system effectively fights stains that were previously too difficult to remove. It includes an oil-based laundry spotter for the removal of oil-based stains, a general-purpose spotter for a broad spectrum of stains, and a rust and iron removing spotter—all made from chemicals that are biodegradable and contain no harmful ingredients.
